

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 17-08-2025

**Child's Name:** Dayel Mohammed D S Al Naimi

**Date of Birth:** 23-03-2021

**Sex:** Male

**Guardian:** Mohammed

### Overview

Dayel was assessed in person at our center. Findings indicate **information processing delays** and **global developmental delays** leading to **acquired features of autism** and **hyperlexia-like features**. The child is open to improvement. **Further assessment and testing** are recommended to refine the intervention plan and identify contributing factors.

### Recommended Plan

#### 1. Development Protocol for Information Processing

- Implement for 4 months, then reassess in person.
- Reevaluate the plan and establish a clear baseline.
- Continue and adjust the intervention according to observed progress.

#### 2. Main Recommended Analyses

**Recommended Tests through Neurazon (Canada):** Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly.

#### 3. Therapy

- **Neuroplasticity rehabilitation therapy:** intensive program in later stages. The child is not ready for intensive therapy yet.

### Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through **Neurazon (Canada)**. These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are **not conducted directly through our center**.
