Director's Report on Developmental Progress Assessment

Date of Visit: 14-08-2025

Child's Name: Hamza Abd Al Baset Al Hamid

Date of Birth: 07-12-2019

Overview:

Hamza Abd Al Baset Al Hamid visited our center for a developmental assessment. The evaluation indicated **information processing delays** and **developmental delays**; however, the child does not score as a case of autism. Further assessment is recommended to monitor progress and determine any additional areas requiring targeted intervention. The child is capable of improvement and attending regular school.

Recommended Plan:

1. **Development Protocol for Information Processing**
 - Implement for 4 months, followed by an in-person reassessment.
 - Reevaluate the plan and establish a developmental baseline.
 - Continue with the intervention plan according to observed progress.
2. **Recommended Tests:**
 - To be determined based on the next evaluation.
3. **Recommended Therapy:**
 - **Neuroplasticity Rehabilitation Therapy:** 2–3 sessions per week.

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests, if suggested in future evaluations, may be external and are intended to support a deeper understanding of the child's developmental profile.

END OF REPORT

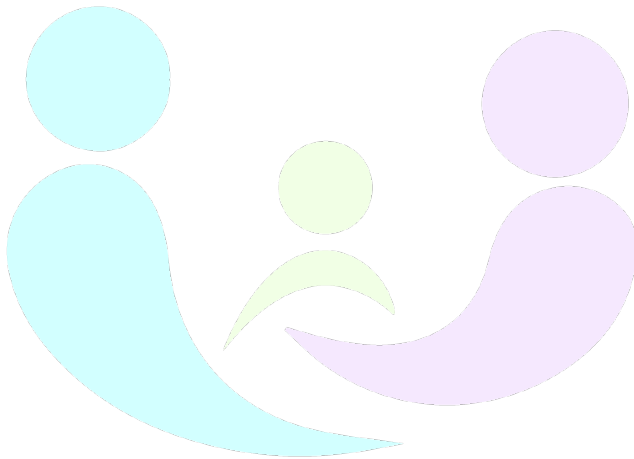

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
