

Director's Report on Developmental Progress Assessment

Date of Visit: 01-07-2025

Children's Names: Reem AlQahtani & Noora AlQahtani

Date of Birth: Reem – 13-07-2016 | Noora – 10-02-2018

Overview:

Reem and Noora AlQahtani visited our center for follow-up developmental assessments. Both children showed significant improvement following the initial intervention protocols. However, both still exhibit **information processing delays** resulting from underlying **developmental delays**, which have led to **acquired features of Autism Spectrum Disorder (ASD)**. It is important to note that these features are not indicative of classic or genetically rooted autism but rather acquired developmental patterns that can improve with proper support. Further evaluation is necessary to assess the full extent of improvement and determine the next phase of intervention.

Recommended Plan:

1. Developmental Non-Medicinal Protocol for Information Processing:

- Duration: Continue for 4 to 6 months.
- Follow-Up: A full reassessment is recommended at the end of this period, preferably in person.
- Objective: Establish a new developmental baseline and adjust the protocol accordingly.

2. Main Recommended Analysis (Through Canada via Neurazon):

- Please refer to their report and assessment.

3. Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy (Intensive):**
 - Frequency and duration to be tailored according to individual response and availability.

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The children are open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the children's developmental profiles. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

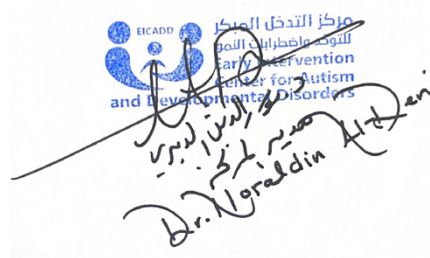

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

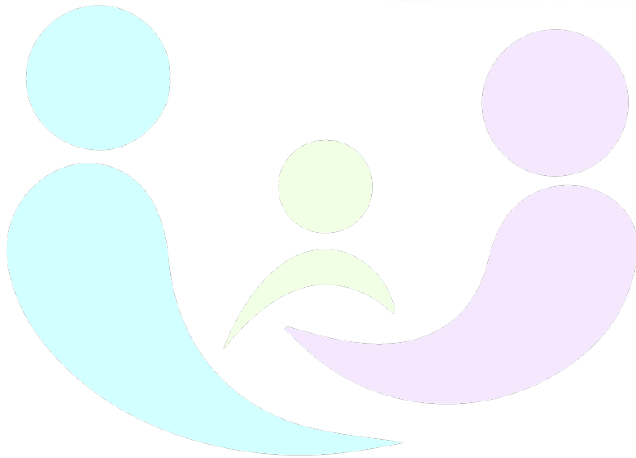

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

Dr. Noraldin Al-Dain
