

Valid for only 4 months
after day of assessment

Director's Report on Developmental Progress Assessment

Date of Visit: 11-09-2025

Child's Name: Fayzah-Ali Abedali

Date of Birth: 21-02-2015

Gender: F

Guardian: Ali

Overview:

Fayzah was assessed online for a developmental progress evaluation. The findings indicate **information processing delays and intellectual developmental delays**, leading to **acquired features of autism**. However, she does **not score as a case of autism**.

Recommended Plan:

1. **Development Protocol for Information Processing**
 - Implement the protocol for 4 months, then reassess, preferably in person.
 - Reevaluate the plan and establish a baseline.
 - Continue with the intervention plan.
2. **Main Recommended Analyses (through Neurazon – Canada):**
 - **Please refer to their report and assessment. These are not done at EICADD.**
3. **Therapy**
 - **Neuroplasticity rehabilitation therapy** (intensive to start as soon as possible).

Conclusion:

This assessment is **not a final diagnosis** but rather a developmental evaluation based on current observations. Fayzah is open to improvement, and the findings may change with progress and intervention.

**Valid for only 4 months
after day of assessment**

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are **external** and provided through **Neurazon (Canada)**. These are **suggestions, not obligatory**, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are **not conducted directly through our center**.

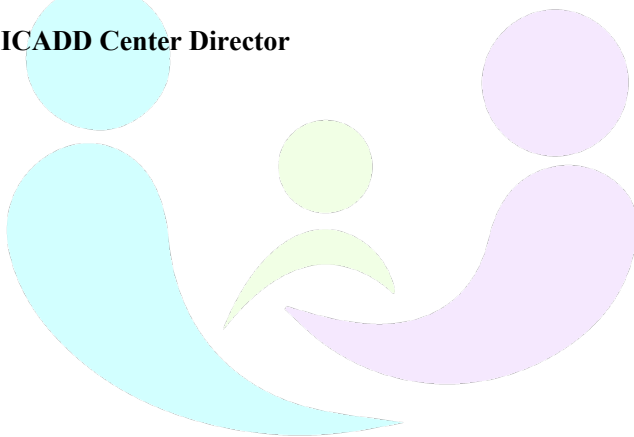

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

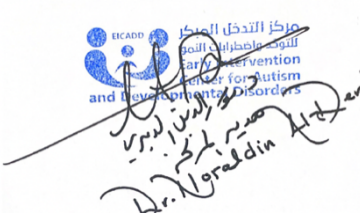

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
