

Director's Report on Developmental Progress Assessment

Date of Visit: 23-06-2025

Child's Name: Hasan Allaham

Date of Birth: 19-04-2019

Overview:

Hasan visited our center for a developmental assessment. During the evaluation, Hasan showed signs of information processing delays and regressive developmental delays, which have led to acquired features of autism and Hyperlexia Type 2-like characteristics. These findings suggest that further assessment is necessary to better understand the underlying causes and determine the best course of intervention.

Recommended Plan:

1. Development Protocol for Information Processing:

- Implement a tailored developmental protocol focusing on improving information processing over a period of **4 months**.
- Reevaluate the child after 4 months, preferably through an in-person assessment.
- Establish a developmental baseline and continue the current intervention plan based on progress.

2. Recommended Tests through Neurazon (Canada):

Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly.

3. Recommended Therapy after Determining the Causes:

- **Neuroplasticity rehabilitation therapy** in the UAE (intensive)
- **Mitotherapy** in Jordan (intensive light therapy and mitochondrial support)

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

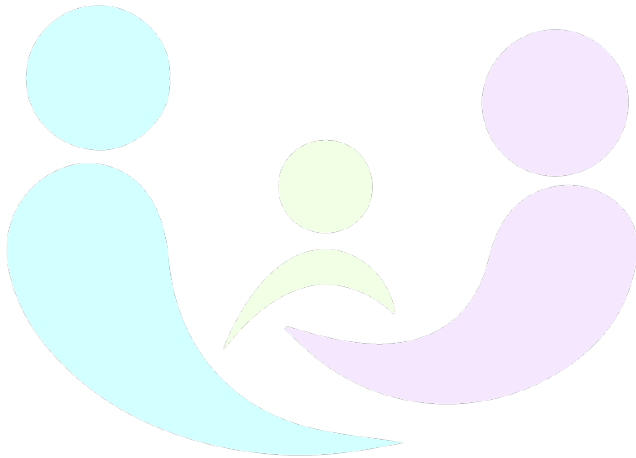

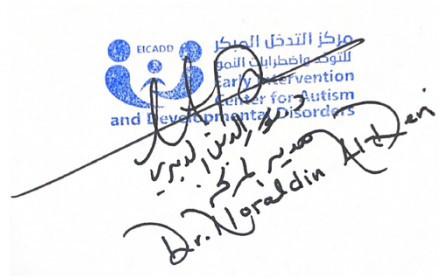

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
