

**Date of Assessment:** 28-06-2025  
**Child's Name:** Fuad Ashraf Salah  
**Date of Birth:** 06-06-2018  
**Age:** 7 years and 0 months  
**Gender:** Male  
**Guardian:** Ashraf

### Assessment Summary:

Fuad Ashraf Salah was assessed at our center due to concerns regarding his learning abilities and developmental progress. The evaluation indicates that the child has **information processing delays** and **developmental delays**, which have contributed to **minimal acquired features of autism**. However, based on clinical scoring and observation, Fuad **does not meet the diagnostic criteria for Autism Spectrum Disorder (ASD)**.

The child also demonstrates **learning difficulties**, which require a structured intervention plan and deeper investigation into the root causes. With targeted therapies and further testing, significant improvements can be expected.

### Recommended Plan:

#### 1) Development Protocol for Information Processing:

- Initiate a tailored developmental protocol focused on improving cognitive processing and adaptive responses.
- Duration: **4 months**, followed by in-person reassessment.
- Establish a measurable baseline to track improvement and adjust the intervention accordingly.

#### 2) Recommended Tests through Neurazon (Canada):

- Please refer to their report and assessment.

#### 3) Recommended Therapy:

- **Mitotherapy (Light Therapy):**
  - Frequency: 2 sessions per week to support mitochondrial function and neurological energy balance.
- **Speech and Occupational Therapy:**

- **Speech Therapy:** 2 sessions per week to enhance expressive/receptive language skills.
- **Occupational Therapy:** 1–2 sessions per week to improve fine motor coordination, attention, and executive function.

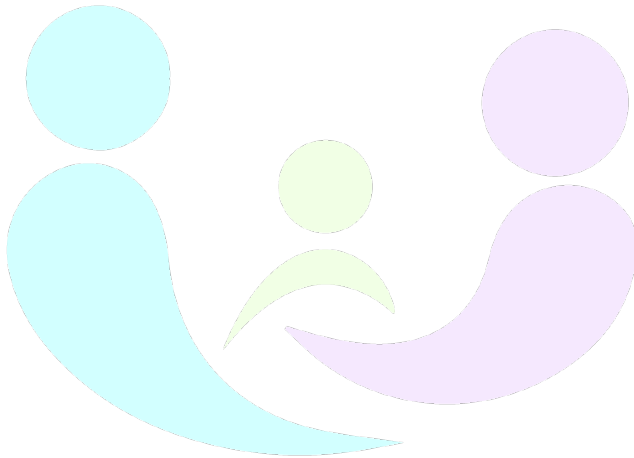

**Centers' Leading Staff:**

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

**EICADD**
