
Director's Report on Developmental Progress Assessment

Date of Visit: 21-07-2025

Child's Name: Mohammed Hassan M Al Shaikhi

Date of Birth: 01-12-2018

Overview:

Mohammed was assessed and found to have **information processing delays, developmental delays**, and features of **Hyperlexia Type 2**, which are acquired features of autism. Genetic analysis indicates the presence of a **variant affecting brain development and contributing to epileptic activity**, which is likely influencing his developmental trajectory. While the child shows some features resembling autism, he does not meet the criteria for classical autism and instead presents with **regressive and processing-related developmental challenges**.

Recommended Plan:

1. Development Protocol for Information Processing:

- Implement for **4 months**
 - **In-person reassessment** recommended afterward
 - Continue and adapt intervention based on established baseline
-

Recommended Tests through Neurazon (Canada):

Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly. These analyses are not done at EICADD.

Recommended Therapy:

- Continue **therapeutic support in home country**
 - Begin **intensive Neuroplasticity Rehabilitation Therapy** as soon as possible
-

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the

child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

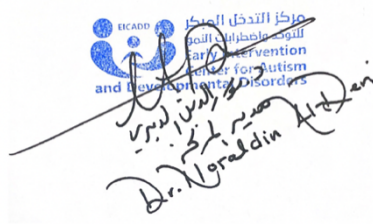

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

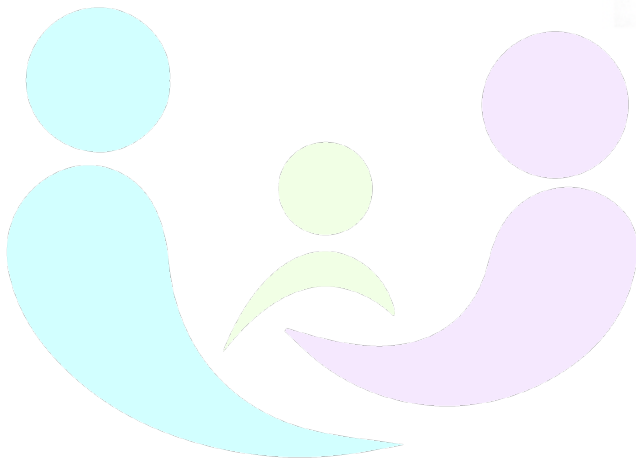

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

Dr. Noraddin Al-Dan
