Director's Report on Developmental Progress Assessment

Date of Visit: 03-09-2025

Child's Name: Eliana Haroush Khila

Date of Birth: 14-11-2022

Age: 2 years, 9 months

Gender: Female

Guardian: Haroush

Overview

Eliana was assessed at our center on 03-09-2025. The evaluation revealed **information processing delays** and **developmental delays** that are concerning for her age. While she does **not score as a case of autism**, she is considered **at risk** and in need of **early and immediate intervention**. Further analyses are required to understand the underlying causes and to create a well-structured developmental program tailored to her needs.

Recommended Plan

1) Development Protocol for the Information Processing

- Implement a **4-month structured developmental protocol** focusing on information processing.
- Conduct a **reevaluation after 4 months**, preferably in person.
- Establish a **baseline** during reevaluation for measurable tracking.
- Continue and adjust the intervention plan as necessary.

2) Main Recommended Analyses (through Neurazon – Canada)

The recommended analyses are coordinated through **Neurazon (Canada)**. These are **recommendations, not obligatory**, and are **not conducted directly through our centers**. They are suggested to provide a deeper understanding of Eliana's developmental profile. Please refer to their report and assessment.

3) Therapy

- **Neuroplasticity rehabilitation therapy:** Intensive sessions to begin **as soon as possible**.
- Therapy should focus on strengthening **cognitive processing, speech, and adaptive developmental skills**.

Conclusion

Eliana demonstrates **information processing and developmental delays** that warrant **early and intensive intervention**. Although she does not meet autism criteria at this stage, she is **vulnerable to developing further challenges** if intervention is delayed. The recommended therapies and external analyses will help clarify contributing factors and support her developmental progress. A **reevaluation in 4 months** is essential to monitor improvement and adjust the plan accordingly.

Notes on External Testing

The recommended analyses are coordinated through **Neurazon (Canada)**. These are **recommendations, not obligatory**, and are **not conducted directly through our centers**. They are suggested to provide a deeper understanding of Eliana's developmental profile.

Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current findings. Eliana is **open for improvement**, and results may evolve with consistent therapy and monitoring. The recommended tests are external and provided through Neurazon (Canada). These are **suggestions only**, intended to complement the developmental plan.

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
