

Radiology Report

Pat. Name	Aram Majed Alhalaf	Order No.	28579787
File No.	2031537	Pat. Type	Out Patient
Gender	Female	Visit Date	08-12-2022 10:43
Age	3Y 11M	Referring Doctor	Ahmed Hussein Iqelan
Exam	MRI BRAIN	Technician	Abdulhamid Khalil Ibrahim Abunadi
Exam Date	11-12-2022 14:28	Report Typed	11-12-2022 14:31
		Report Status	Confirmed 11-12-2022 14:31

Report :

MRI BRAIN

CLINICAL INDICATION: microcephaly

TECHNIQUE: Multiplanar, multisequential images were acquired from brain without IV contrast administration

FINDINGS:

- Grey and white matter structures of brain parenchyma are returning normal signals.
- No ischemic infarction, intracranial haemorrhage or space occupying lesion.
- No cerebral edema, midline shift or hydrocephalus.
- Brainstem and cerebellum are normal.
- Normal sella and parasellar regions.
- Normal bilateral vestibulo-cochlear nerve complexes.
- Visualized globes appear unremarkable bilaterally. Mucosal thickening seen in bilateral ethmoid , maxillary sinuses and right mastoid air cells denoting inflammatory changes in them.

IMPRESSION:

- No ischemic infarction, intracranial haemorrhage or space occupying lesion.

Dr. Liaqat Mehmood Javed Akhtar
